I believe that design is, at its roots, a powerful tool/ domain that lays the groundwork for innovation and progress, and that there has never been a more important time for designers to reach and push any limits possible. I am highly motivated by the future of design, as it extends far beyond conventional applications (services, experiences, products, etc.) like politics and management.

PROFESSIONAL EXPERIENCE

2021 - **Sender (Paris, France) Senior Product Designer (permanent)**

(Service design, UX, UI) We pilot all design and research activities as an internal agency, in partnership with Engineering and Product teams, on our 4 road freight logistics management softwares. Responsible for the carrier marketplace, and shipper analytics platforms.
